9. The quotations are liable to be cancelled if any of the above mentioned conditions are not complied with.
10. The quantity may be increase or decrease at the time of purchase.

(Sanjay Kumar)
Registrar

Technical Details:

Gel Doc System:

- ① **The Gel Doc system is a compact and automated imaging system for obtaining publication-quality Images and analyzed results with just the push of a button.**

Easy to use: there is no need for manual control of filters, lens, or lights. Create a default protocol once, then use the green button on the front of the instrument to reproducibly use these settings time and again Publication-quality images and completely analyzed results — decreased pixelation when images are cropped or zoomed. Get relative molecular weights, quantitation of bands, Excel reports, PDFs, and more Time and space saving — faster results without timeconsuming steps in image acquisition and save benchspace using this compact system Modular design and flexible options — Use specific clearly defined and color-coded trays for specific applications. Purchase only what you want and upgrade when your needs change Stain-free technology — Condense a 2 hr Coomassie protocol into a 5 min stain-and-image step. Stain-free gels are western blot compatible, allowing you to check electrophoresis results and quality prior to western blotting. These “green” gels provide equal or better sensitivity compared to Coomassie staining and eliminate organic waste disposal concerns
